PROJECTS

Internet Speed-test Application
A project made to test internet speeds across various frequencies and bandwidths:

- Focused on testing internet speeds on multiple frequencies, bandwidths and other parameters, while also showing an intuitive network graph with real time statistics.

Inspectify
A project dedicated to cybersecurity excellence, contributing to the following:

- Identifies vulnerabilities in networks, applications, and systems through advanced scanning techniques.
- Implemented functions like network and port scanning, directory brute-forcing, Wi-Fi analysis, and HTTP header inspection for in-depth security tests.
- Aimed to identify security gaps, promoting stronger defenses, and improving overall digital resilience.

Research Ninja
A project dedicated to content research for marketing, contributing to the following:

- perform research for content ideas related to business niche, also provides full fledged business metrics to predict success chances of the content ideas.
- Implemented features like business metrics, success:failure, business viability, etc.
- Aimed to provide best content ideas that actually work for the respective business niches.

CERTIFICATIONS

1. Foundation of Cybersecurity from **Coursera** in August 2024
2. Cybersecurity Analyst Job Simulation by PWC from **Forage** in September 2024
3. Software Development Job Simulation by AIG from **Forage** in January 2025
4. Gen AI Mastermind from **Outskill** in February 2025
5. AI Tools Workshop from **be10x** in March 2025
6. Art of Prompt Engineering and Gen AI from **WABBITHIRE** in March 2025

ACHIEVEMENTS

1. Organized an international conference on cyber-physical systems at **Christ University, Delhi-NCR**
2. Student Ambassdor of **OnePlus India Pvt. Ltd.**
